Important Notice: BioMed Central

Due to budget constraints and a change in the BioMed Central Institutional Membership pricing model, the HAM-TMC Library has not renewed its institutional membership for the fiscal year 2007. Authors at The University of Texas Health Science Center at Houston and Baylor College of Medicine interested in publishing articles in BioMed Central journals, will have to pay the required author fees.

The HAM-TMC Library continues to strongly support Open Access and maintains its institutional membership with Public Library of Science. However, the increase in costs for our BioMed Central institutional membership is so prohibitive that we cannot renew it. Please contact eresources@library.tmc.edu with questions or comments.

Access to Current Contents Database Ending October 1

Effective October 1, 2006, the HAM-TMC Library will cancel its subscription to the Current Contents database reasons for the cancellation include:

- Lack of Currency For the journals Library users read more frequently, information generally appears in PubMed three days to three weeks earlier than it appears in Current Contents.
- Duplicate Coverage The journals covered in Current Contents are also covered in the Web of Science database. A citation appears in Web of Science within two to three days of when it appears in Current Contents.
- Expense The cost of Current Contents equals or exceeds the combined cost of databases such as UpToDate, Journal Citation Reports (impact factors), and SCOPUS.

A study by the M.D. Anderson Cancer Center Research Medical Library available at (http://www3.mdanderson.org/library/alert/newsbytes4_06.html#One) provided evidence for making this decision.

If you use Current Contents and would like help searching alternative databases, please contact the Information Services desk (713.799.7161, 713.799-7162 or <u>reference.librarian</u> <u>@library.tmc.edu</u>). If you have questions about the cancellation, please contact Leah Krevit (713.799.7126 or <u>leah.krevit@exch.library.tmc.edu</u>).

New and Returning TexShare Databases

TexShare, the state-wide resource sharing program for academic and public libraries, provided more than 50 databases available beginning July 1, 2006. These include general databases such as Academic Search Premier, science and technology databases such as Health Source and Computer Source, and many others. The databases are currently available to Educational Level users at the Databases A-Z

List on the Library's website. Descriptions of each database will be available soon.

The complete list includes:

Ebsco:

Academic Search Premier

AGRICOLA

Alt Health Watch

Bibliography of Native North Americans

Business Source Complete

Computer Source

Consumer Health Complete

Economia y Negocios

Encyclopedia of Animals

ERIC

Fuente Academica
