Impact Factors on BioMed Central Journals

Forty-seven journal titles published in BioMed Central are now tracked by Thompson Scientific (ISI) for Journal Citation Reports. A journal must be tracked for three years before being assigned an impact factor. Since BioMed Central journals are relatively new, many may have not yet been assigned an impact factor, but 25 titles are currently ranked, with 22 more scheduled to receive a ranking within two years.

For a list of BioMed Central journals with Impact Factors check the Library website at:

Library Exhibit Features Books from McGovern Collection

A display from The McGovern Collection on the History of Medicine, featuring books of general and ophthalmologic anatomical illustrations, is currently on view in the HAM-TMC Library's lobby hallway and just inside the library entrance. An exhibit near the reference books highlights Sir William Osler's and Dr. John McGovern's contributions to libraries through their fascinating book collections.

The McGovern Collection contains over 5,500 titles and focuses on the development of the medical specialties in the late nineteenth and early twentieth century. The books are cataloged in the HAM-TMC Library's on-line catalog and are available for use in the Rare Book Room on the Library's second floor.

Microsoft Office Classes Offered at the Library

The HAM-TMC Library in conjunction with New Horizons Houston will be offering classes on Microsoft Office Access and PowerPoint. The HAM-TMC Library classroom is located at 1133 John Freeman Blvd., Houston, TX 77030-2809. All classes will be held in the Street Level Classroom.
