Journal of Applied Research on Children: Informing Policy for Children at Risk

Volume 9, Issue 1

Foster Care: Challenges and Opportunities to Reducing Health Disparities

Editors-in-Chief:

Christopher Greeley (Texas Children's Hospital, Baylor College of Medicine)

Robert Sanborn (CHILDREN AT RISK)

Guest Editor:

Anu Partap (UT Southwestern Medical Center, Rees-Jones Center for Foster Care Excellence at Children's Health)

Published by CHILDREN AT RISK and the Texas Medical Center Library and edited by the [CHILDREN AT RISK Institute](#), the *Journal of Applied Research on Children (JARC)* serves to inform policy affecting children by providing applicable research to the public, child advocates, and policymakers on timely children's issues. Providing practical case studies and research on the transformative potential of policy change, JARC issues provide a powerful link between data and policy solutions to strengthen the arguments of child advocates across the country.

For the sixteenth issue, Foster Care: Challenges and Opportunities to Reducing Health Disparities, the CHILDREN AT RISK Institute invites research concerning (but not limited to): the health, special health care needs and disparities among children and young adults in foster care (foster homes, kinship, or residential treatment) due to child welfare involvement. Research is also welcome in areas with implications for children in foster care, including impact of childhood adversities, as well as trends and gaps in health care and child welfare policy and treatment.

The CHILDREN AT RISK Institute is seeking articles that include data-oriented evidence on the population health status, approaches to assessment, treatment and supportive care, emerging therapeutic modalities, models of care delivery, caregiver supports, child safety, permanency, trends in protective and risk factors for health and well-being, and related policy implications for children experiencing out-of-home care by child welfare.

The *Journal of Applied Research on Children* is available online in an open-access format (jarc.childrenatrisk.org) and is indexed in CINAHL and SocINDEX, making it available to child advocates, researchers, practitioners, and policymakers across America. Since its launch, journal articles have been downloaded over 165,000 times. The submission and double-blind peer review process are completed entirely online. Authors are encouraged to take advantage of the journal's online format by including videos, interactive charts, or links to online resources.

We encourage interested authors to submit an abstract or letter of interest to the managing editor at mjohnston@childrenatrisk.org. If the abstract is approved, full manuscripts will be due **March 2, 2018**. To view past issues of the journal or to submit a manuscript, please visit jarc.childrenatrisk.org.
