<b>Repository:</b>	Houston Academy of Medicine-Texas Medical Center; 1133 John Freeman Blvd.Houston, Texas 77030-2809.
<b>Creator:</b>	William Curry Moloney MD
<b>Title:</b>	William C. Moloney MD papers;
<b>Dates:</b>	1952-1954.
<b>Quantity:</b>	.25 cubic foot (1 box).
<b>Abstract:</b>	William C. Moloney MD kept a personal journal, with photographs, for much of his two years in Japan with the Atomic Bomb Casualty Commission. In January of 1986, Dr. Moloney donated his journal, correspondence and diary pages to the Harris County Medical Archive. He died in 1998 at the age of 91. His first contribution was a set of ten reprints representing his work with the ABCC from 1952 to 1954. Dr. Moloney's journal is a fine document, one which will be of great use to historians. It is an important record of personal impressions, thoughts and details of events. The journal gives new insights into the work of the ABCC and into the people who participated in that work. Dr. Moloney wrote in his journal from April 1952 to February 1954. The Korean War was on and there was a great deal of military activity in southern Japan. The collection is open for research. The collection consists of a handwritten journal, loose calendar or notebook pages and some reprints. The journal is in generally fair condition. The paper is slightly acidic and the binding is loose. There are numerous photos glued onto the pages. The collection encompasses the years 1952-1954 and is 0.25 cubic feet (1 box).
<b>Identification:</b>	MS 73
<b>Location:</b>	Houston Academy of Medicine-Texas Medical Center Library.
<b>Language:</b>	English. Japanese.

## Biographical Notes

William Curry Moloney was born in Boston Massachusetts on December 19, 1907. He died in 1998.

He studied medicine at Tufts College and graduated in 1932 with a Doctor of Medicine degree. In 1961, he was awarded an honorary Doctorate of Science from the College of the Holy Cross. Dr. Moloney was associated with the Medical School of Tufts University for forty years. He began his career in 1934

as an assistant, then rose to a full professor in 1971 and retired in 1974. Dr. Moloney became Emeritus Professor of Medicine, Harvard Medical School in 1974- and Emeritus Physician and Chief of the Hematology Division, Peter Bent Brigham Hospital in 1967. He also served concurrent posts: Consultant, Boston Hospitals, 1938-, consultant, Boston City Hospitals, 1948-, director of clinical laboratories.

He is a fellow or member of the following organizations: American Association for the Advancement of Science, American Federation of Clinical Research, American Medical Association, American College of Physicians, Association of American Physicians.

Dr. Moloney served in Japan with the Atomic Bomb Casualty Commission (ABCC) as the Chief of the Department of Medicine from 1952-1954. His hematology research at ABCC allowed him to work scientists from many departments.

Dr. Moloney and his wife, Josephine "Jo" (O'Brien) had four children.

## Scope and Content Note

William C. Moloney MD kept a personal journal, with photographs, for much of his two years in Japan with the Atomic Bomb Casualty Commission. In January of 1986, Dr. Moloney donated his journal, correspondence and diary pages to the Harris County Medical Archive. He died in 1998 at the age of 91. His first contribution was a set of ten reprints representing his work with the ABCC from 1952 to 1954. Dr. Moloney's journal is a fine document, one which will be of great use to historians. It is an important record of personal impressions, thoughts and details of events. The journal gives new insights into the work of the ABCC and into the people who participated in that work. Dr. Moloney wrote in his journal from April 1952 to February 1954. The Korean War was on and there was a great deal of military activity in southern Japan. The collection is open for research. The collection consists of a handwritten journal, loose letters and reprints.

In this collection are letters, a journal and reprints. There are three letters written in May and July 1952. Two are typed and one handwritten. There are also loose pages from his diary starting on the Moloney family's departure from Boston in April 14, 1952 with the last entry dated December 11, 1952. There are references to their near disaster off Hilo on the way to Japan. The last item in this series is the jewel in the crown - Dr. Moloney's journal. The entries date from January 16, 1953 to February 27, 1954. Unfortunately there are gaps where he did not make entries. The numbered pages between 195 and 200 are missing. Dr. Moloney literally wrote from cover to cover in his journal. Glued or taped onto the journal pages are 165 black and white glossy photographs (there are 166 photographs in the journal) and a variety of other items (business cards, invitations, clippings, announcements, a golf score card, yen, postcards, driver's permits.) The typescript translation of an article from The Chugoku Press, 20 September 1953

originally placed between pages 101 and 102 has been removed and placed in envelopes. A folded map of Japan remains in the back of the journal.

The physical condition of the journal is mixed. The photographs are in good condition and the ink on the pages remains clear and crisp. The spine is broken and the pages are becoming detached. The tape and news clippings have yellowed and become brittle. The collection encompasses the years 1952-1954 and is 0.25 cubic feet (1 box).

## **Administrative Information**

### **Preferred Citation**

The William C. Moloney papers; MS 73; John P. McGovern Historical Collections and Research Center, Houston Academy of Medicine-Texas Medical Center Library.

### **Acquisition Information**

In January of 1986, Dr. Moloney donated his journal, correspondence and diary pages to the Harris County Medical Archive (later renamed the John P. McGovern Historical Collections and Research Center). His first contribution was a set of ten reprints representing his work with the ABCC from 1952 to 1954.

### **Processing Information**

All hinges, staples, and paper clips have been removed. An archival bond was interleaved to keep related documents and attachments together. The loose diary pages, correspondence and typescript translation of a newspaper article have been placed in envelopes to maintain their integrity and to contain some possible contaminants.

## Detailed Description of the Collection

### Series I: Journal; 1952-1954

Scope and Content Note: In this series are three letters written in May and July 1952. Two are typed and one handwritten. There are also loose pages from his diary starting on the Moloney family's departure from Boston in April 14, 1952 with the last entry dated December 11, 1952. There are references to their near disaster off Hilo on the way to Japan. The last item in this series is the jewel in the crown - Dr. Moloney's journal.

The entries date from January 16, 1953 to February 27, 1954. Unfortunately there are gaps where Dr. Moloney did not make entries. The numbered pages between 195 and 200 are missing. Dr. Moloney literally wrote from cover to cover in his journal. Glued or taped onto the journal pages are 165 black and white glossy photographs (there is a total of 166 photographs in this series) and variety of other items (business cards, invitations, clippings, announcements, a golf score card, yen, postcards, driver's permits.) The typescript translation of an article from The Chugoku Press, 20 September 1953 originally placed between pages 101 and 102 has been removed in placed in L-velopes. A folded map of Japan remains in the back of the journal.

The physical condition of the journal is mixed. The photographs are in good condition and the ink on the pages remains clear and crisp. The spine is broken and the pages are becoming detached. The tape and news clippings have yellowed and become brittle.

A good summary of the journal was written by Dr. Moloney on September 16, 1985.

"I kept a "Journal," sort of a diary for 1952, 53 up until March 1954. I incorporated a lot of photographs of various VIP types, (including Joe Dimagio[sic]Dimaggio, Marilyn Munroe[sic]Monroe and Eleanor Roosavelt [sic]Roosevelt).It is a rahter [sic]rather personal Journal with reading notes, etc. included. I [sic] It reflects also the frustrations and criticisms of the program as I saw it . . . "

### Series II: Reprints; 1960-1964

Scope and Content Note: The reprints are arranged in alphabetical order by title. Dr. Moloney described the reprints in the following statement on September 16, 1985:

"While they do not represent a great contribution, I believe the studies I carried out with Bob Lange on the preclinical phase of CML were important, i.e., the finding that the early CML cases demonstrated very low alkaline phosphate activity in polymorphological leukocytes was at least an original observation. Unfortunately, as you know, at the time we had no cytogenetic capability . . . "

Box	Folder
-----	--------

- 1 - Reprint 1. "Cytological and biochemical studies on the granulocyte in early leukemia among Atomic bomb survivors." William C. Moloney and Robert D. Lange. Reprinted from Texas Reports on Biology and Medicine, Vol. 12, No. 4, pages 887-897, Winter, 1954. 1954.
- Reprint 2. "Data on linkage of ovalocytosis and blood groups." T. Fujii, W.C. Moloney and N.E. Morton. Reprinted from American Journal of Human Genetics, Vol. 7, No. 1, March 1955. 1955.
- Reprint 3 "Kernicterus in Japanese infants." Clara Margoles, Kenji Katami, William C. Maloney, i.e., Moloney, Angel Pentschew, Wataru W. Sutow, and Webb Haymaker. Reprinted from World Neurology, September 1960, Vol. 1, No. 3. September 1960.
- Reprint 4. "Kernicterus in Japanese infants. I. Clinical and serological data from 25 patients." Wataru W. Sutow, William C. Moloney, Clara Margoles. Reprinted from Pediatric, Vol. 17, No. 3, March 1956. 1956.
- Reprint 5. "Leukemogenic effects of ionizing radiation on Atomic Bomb survivors in Hiroshima City." William C. Moloney and Marvin A. Kastenbaum. Reprinted from Science, February 25, 1955, Vol. 121, No. 3139, pages 308-309. 1955.
- Reprint 6. "Leukemia in survivors of Atomic bombings." William C. Moloney. Reprinted from the New England Journal of Medicine, 253:88-90 (July 21), 1955. 1955.
- Reprint 7. "Leukemia in survivors of Atomic bombings. I. General Observations." Robert D. Lange, William C. Moloney, and Tokuso Yamawaki. Reprinted from Blood, The Journal of Hematology, Vol. IX, No. 6, June 1954. 1954.
- Reprint 8. "Leukemia in survivors of Atomic bombings. II. Observations on Early Phases of Leukemia." William C. Moloney and Robert D. Lange. Reprinted from Blood, The Journal of Hematology, Vol. IX, July 1954. 1954.
- Reprint 9. "Linkage in man. Pelger's nuclear anomaly, taste, and blood groups." N.E. Morton, W.C. Moloney, and T. Fujii. Reprinted from American Journal of Human Genetics, Vol. 6, No. 1, March 1954. 1954.
- Reprint 10. "Neonatal jaundice and kernicterus." B. Black-Schaffer, S. Kambe, M. Furuta, and W.C. Moloney. Reprinted from A.M.A. American Journal of Diseases of Children, June 1954, Vol. 87, pp. 737-751. 1954.
