Save the Date: Digital Discovery Conference March 27, 2008

Digital Discovery: Issues in Scholarly Publishing, an Elsevier Library Connect Program coordinated by HAM-TMC Library and Rice University Fondren Library, will take place at The University of Texas School of Nursing at Houston on Thursday, March 27, 2008, 8:30 am – 3:00 pm.

This year's conference will start with a continental breakfast and includes lunch and refreshments during breaks. Elsevier is sponsoring this event. Registration is free.

The [conference website](#) is currently under construction and will soon provide more information on the speakers, venue, and other conference details.

Please save this date and watch for the invitation and more news. We hope you will be able to join us.

For more information, please contact [Dean James/](#) and select databases.

Library to Host the exhibit *Changing the Face of Medicine: Celebrating America's Women Physicians*

The HAM-TMC Library is one of 61 libraries from across the U.S. selected to host "Changing the Face of Medicine: Celebrating America's Women Physicians" an interactive, multimedia traveling exhibition that honors the lives and achievements of American women in medicine – past and present.

The exhibit features stories from a rich diversity of women physicians from around the nation and highlights the broad range of medicine that women have practiced.

The traveling exhibition "Changing the Face of Medicine: Celebrating America's Women Physicians" was developed by the Exhibition Program of the History of Medicine Division of the National Library of Medicine (NLM), in collaboration with the American Library Association Public Programs Office. The traveling exhibition is made possible by the NLM and the National Institutes of Health Office of Research on Women's Health. The American Medical Women's Association provided additional support.

Editorial Cartoons Exhibit at the Library until April 5, 2008

Cartoonists Take Up Smoking is an exhibit of editorial cartoons which addresses the health, economic and social issues of tobacco use in the 20th century. It is on view at the Houston Academy of Medicine-Texas Medical Center Library until April 5, 2008.

Although the health consequences of smoking and chewing tobacco have been documented in medical literature and to the public, sometimes a picture (with a caption) is indeed worth a thousand words. The exhibit includes work originally published in local media. Advertisements including those in medical journals are shown in the exhibit.

The exhibit is sponsored by The University of Alabama Center for the Study of Tobacco and Society, The University of Texas M.D. Anderson Cancer Center and Houston Academy of Medicine-Texas Medical Center Library.

Library Receives Consumer Health Award from NN/LM SCR

The HAM-TMC Library received an Access to Electronic Consumer Health Information award from the NN/LM SCR to develop and implement the *South Central Houston Community Health Information Center* project. This project partners the Library and South Central Houston Community Health Center (SCHCHC). SCHCHC is the oldest Federally Qualified Health Center in Houston. Project funds will be used to develop a health information center at SCHCHC's Riverside Clinic facility. The health information center will include ten Internet-connected computers and a networked printer for client/patient use. Project funds will also be used to provide on-site instruction on use of electronic consumer health information resources. The project extends the "information prescription" model in that health care providers and clinic staff members at South Central Houston Community Health Center will refer clients/patients to the health information center to gain a better understanding of health-related issues.

News in Health

The issue of *News in Health*, a publication that includes practical health news and tips based on the latest NIH research, is now available at: <http://newsinhealth.nih.gov/>

Featured Stories:

- [*Preventing Cancer: Learn How to Lower Your Risk*](#)
