## Administrative history / Biographical sketch

---

### Note

William J. Schull, PhD was an American scientist and geneticist famous for his research into the effects of ionizing radiation on the human body largely based on the atomic bombings in Hiroshima and Nagasaki after World War II. Dr. Schull began his scientific career in radiation research in 1949 when he joined the Atomic Bomb Casualty Commission (ABCC), established in Japan in 1946 by the United States National Academy of Sciences, National Research Council to study the effects of the bombings in accordance with a presidential directive from Harry S. Truman. From his first post as Head of the Department of Genetics at ABCC, Dr. Schull served many decades in the elite corps of scientists conducting research into the genetic impact of irradiation on human health. A professor emeritus of The Human Genetics Center, School of Public Health, The University of Texas Health Science Center at Houston, Texas, Dr. Schull served on most of the major governmental and non-governmental committees formed throughout the 20th century to quantify the effects of ionizing radiation. He helped form the genetics department at the University of Michigan where he served as a professor from 1956 to 1972. As his career progressed, Dr. Schull frequently served in executive positions, chairing many of the governmental committees he served on and becoming a director, 1986-1987 and 1990-1991, and in 1996-1997, vice chairman and chief of research of the Radiation Effects Research Foundation (RERF), established in 1975 as the follow-on organization to the Atomic Bomb Casualty Commission. Dr. Schull was inducted into the United States National Academy of Sciences in 2001. In affirmation of his long and honorable service to the Japanese people, Dr. Schull received the Order of the Sacred Treasure, Third Class from the Emperor of Japan in 1992.

William Jackson Schull was born on March 17, 1922 to Gertrude Edna (maiden name Davenport) (1900-1938) and Eugene Shull (1896-1975) in Louisiana, Missouri. While Shull is the last name inscribed on his birth certificate, his name was changed to Schull while he was in elementary school. Dr. Schull spent most of his boyhood in Milwaukee, Wisconsin and graduated from that city's Lincoln High School in 1939. In 1946, Dr. Schull earned a Bachelor of Science in Zoology from Marquette University in Milwaukee, Wisconsin. In 1947, he earned a Master of Science in Zoology from the same university. He received a Doctor Of Philosophy in Genetics From Ohio State University, Columbus, Ohio in 1949.

Enlisting in December 1942, Dr. Schull served in the United States Army as a surgical technician with the 37th Infantry Division in the South Pacific until December 1945. In concert with his scientific work, Dr. Schull valued the preservation of the archival historic record and promoted the preservation of the history of the ABCC and RERF throughout his career. He died June 20, 2017, in Houston.

A detailed curriculum vitae is available for Dr. Schull in the control folder for his collection at the McGovern Historical Collection.

## Custodial history

Deed-3

The McGovern Historical Center received these papers directly from William J. Schull during his lifetime. The papers were used by Dr. Schull during his work at various governmental and non-governmental bodies. In most instances, many people, including Dr. Schull, received copies of material as is common in institutional operations. Due to this, the papers are not always the original but are the copy received by Dr. Schull or forwarded to him by another. While Dr. Schull took many of the photos, others are copies of photos made by the organizations he worked for or the United States military. Film, video, and audio material was usually produced by media professionals that worked for the organizations involved. Copies were then provided to Dr. Schull.

---

## Scope and content

---

MS 67 the William J. Schull papers contains correspondence, interoffice memorandums, presentations, scientific works, journal reprints, monograph drafts, report drafts, travel diaries, travel receipts and itineraries, travel ephemera, other printed material, news clips, exhibit material, photographs, 35 mm slides, audios tapes, video tapes, film, maps and realia in eighty-six cubic feet of material documenting his the life and works. Over 60 percent of the collection documents his life and work at the Atomic Bomb Casualty Commission (ABCC) and Radiation Effects Research Foundation (RERF) in Japan. Twenty five percent of the collection contains papers from his work for various governmental and non-governmental bodies about the effects of ionizing radiation. Another 8 cubic feet contains lbs from his personal life. Dr. Schull created travel diaries about the many international trips required for his work. The collection contains 62 typewritten travel diaries as well as many lbs of travel ephemera, mainly from Japan, collected by Dr. Schull. Dr. Schull wrote several books and the collection contains copies of the historical documents and photographs used in the creation of his books, notably "Song Among The Ruins," his memoir about his time at the Atomic Bomb Casualty Commission. The major theme of this collection is epidemiological and genetic scientific innovation used to quantify the threat posed to the human race by ionizing radiation; to establish the probability of health outcomes to alleviate the fear of survivors, especially about the health of unborn generations; and to provide governments with facts about the consequences of the use of atomic weapons for war and nuclear energy for industrial purposes.

In addition to the records for ABCC and RERF (1945-2014), organizations with a large number of records in the collection include: ICRP, International Commission On Radiological Protection (1980-1995); ICRHER, International Consortium For Research On The Effects of Radiation (1990-2002); UNSCEAR, United Nations, Scientific Committee On The Effects Of Atomic Radiation (1987); WHO, United Nations World Health Organization, Health Effects of Chernobyl Accident (1990s); United States Department of Energy, Advisory Council On Nuclear Facility Safety (1990); United States Environmental Protection Agency, Science Advisory Board, Radiation Advisory Committee (1984-1990); and BRER, United States National Academy of Sciences, National Research Council, Board On Radiation Effects Research (1990s).

While the material is generally in good condition, some of the material suffered flood damage during tropical storm Allison in 2001. Although archivists discarded several lbs that could not be salvaged, they did preserve some material that may have value although flood damage is evident. With the damaged papers, some pages may be stuck together and handwritten notes may be faded beyond recognition. This damaged material is limited to four folders in two boxes, including box 40 folder 1; and box 42, folders 1, 2 and 3.

Dr. Schull collected and preserved all of the material in this collection in the course of his professional career and private life from 1945 to 2014. The collection consists of approximately 135 boxes including oversize and audiovisual. It consists of approximately 86 cubic feet of material.

---

## Notes

---

### Physical condition

While the material is generally in good condition, some of the material suffered flood damage during tropical storm Allison in 2001. Although archivists discarded several lbs that could not be salvaged, they did preserve some material that may have value although flood damage is evident. With the damaged papers, some pages may be stuck together and handwritten notes may be faded beyond recognition. This damaged material is limited to four folders in two boxes, including box 40 folder 1; and box 42, folder 1, 2 and 3.

Dr. Schull collected and preserved all of the material in this collection in the course of his professional career and private life from 1945 to 2014. The collection consists of approximately 135 boxes including oversize and audiovisual. It consists of approximately 86 cubic feet of material.

### Immediate source of acquisition

McGovern Historical Center accessioned these records through a Deed of Gift from Dr. Schull over a number of years in distributions of various sizes and content.

### Arrangement

The series arrangement reflects the various positions that Dr. Schull held during his career as an executive, scientist, and author on the effects of radiation and genetics on human health. This collection is arranged into the following series:

Series I. Radiation Research, ABCC/RERF

Series II. Editorial Positions and Peer Reviews

Series III. Scholarly Works

Series IV. Radiation Research, Governmental and Non-Governmental Bodies

Series V. Genetics Research, Governmental and Non-Governmental Bodies

Series VI. Expert Witness In Litigation

Series VII. Collected Publications

Series VIII. Personal Papers

Series IX. Realia

Series X. Oversize

### Alternative form available

The collection contains a number of formats. Papers include bond, onion paper, yellow ruled tablet and different types of Japanese papers made of rice and silk. Photos, film and video in many formats are in the

collection along with black and white and color 35mm slides and negatives. Audio tape formats are noted in the entries in this finding aid.

### **Restrictions on access**

This collection is open for research. Some material in the collection has been restricted due to the use of patient names, Japanese confidentiality practices, or other considerations about the contents. Consult an archivist about potential access to these materials.

### **Conditions governing use**

Copyright restrictions may apply.

### **Finding aids**

An extensive photo and scrapbook collection also created by Dr. Schull is housed in MS 170 at the McGovern Historical Center. lbs of note in this collection include a scrapbook about Dr. Schull's career containing remembrances from many of his peers and a scrapbook created when he received the Order of the Sacred Treasure, Third Class from the Emperor of Japan. A finding aid for this collection is available. Consult an archivist to obtain access.

### **Related material**

The collection contains oversized ephemera. These lbs are separated, foldered and boxed in Oversize. A large poster about ABCC/RERF history is separated and placed in a Map Drawer. Large maps of Hiroshima and Nagasaki in 1945 have also been separated to the Map Drawer and Oversize depending on the map. Books are boxed and shelved along with the collection. Audio and video tapes are separated and placed in Audiovisual. All lbs are described in this finding aid.

The McGovern Historical Center holds the papers of many people who served at the Atomic Bomb Casualty Commission and the ensuing Radiation Effects Research Foundation. The Center also has a large number of photographs from the Atomic Bomb Casualty Commission. Consult an archivist if access to related materials is desired.

### **Accruals**

The McGovern Historical Center may receive additional papers from Dr. Schull for this collection.

## Series descriptions

---

### **Series MS067-S1 : Series I: Radiation Research, ABCC/RERF;**

Date: 1949-2014 (creation)

Scope and content: Scope and Content Note: This series contains lbs collected by Dr. Schull from the ABCC and RERF. Dr. Schull joined the ABCC in 1949 as the Head of the Department of Genetics. In common with other American scientists, he remained in residence in Japan for two years and then returned to an academic position in the United States but continued his research on ABCC projects. Through a series of academic leaves of absence, Dr. Schull returned to full time work at ABCC/RERF in Japan in January-April 1954, July-September 1956, July 1959-September 1960, February 1964-January 1965, June-September 1968, 1978-1980, 1986-1987, 1990-1991, and 1996-1997. The papers in this series trend mainly towards these time periods. From 1959, Dr. Schull served ABCC/RERF at the Director level and above. Papers after this date reflect his senior executive positions and concern a wide range of ABCC/RERF subjects although papers from the early 1950s contain detailed information about genetics research at ABCC. Unfortunately, many of the early genetics research papers have the most flood damage. Recognized within ABCC for his interest in historic preservation, Dr. Schull received many lbs from others.

Established in Japan in 1946 by a presidential directive from President Harry Truman, the Atomic Bomb Casualty Commission (ABCC) was established to undertake long term studies of the health effects of the atomic bombings on survivors in Hiroshima and Nagasaki Japan. American members of the ABCC faced many scientific challenges along with the physical challenges of living in a foreign, war destroyed country and the human challenges of working with a population scarred irreparably by the atomic bombs' horrific power. Documents in this collection show that initial investigations focused on hematological effects. But ABCC scientists soon realized that many other research protocols were required especially in genetics and epidemiology. They invented more than a few research protocols and contributed strongly

to the 20th century genetics and epidemiology disciplines. Throughout its history, the ABCC faced many challenges centered around its value to the scientific world, funding, and the appropriateness of its mission. In 1975, the Japanese and United States governments renegotiated their agreement so that the Japanese government took the lead in funding and governance although the United States continued to provide funding. The new arrangement caused the organization to be reconstituted as the Radiation Research Foundation (RERF). Today, the contributions of the scientists who worked in the organization are widely respected and highly valued by both countries as their research has proven to be essential to navigating the Atomic Age. Documents in the collection show that Dr. Schull frequently credited the courage and generosity of the Japanese people for their participation in studies that were all too frequently physically painful, time consuming, and intrusive to personal privacy. This series is organized in subseries that reflect the daily operations of the ABCC and RERF. Material about the history of the ABCC and RERF is included in this series.

Publication status:

Published

**Subseries MS067-S1ss1: Subseries I: Official Publications**

Scope and content: Scope and Content Note: Scope and Content Note: The ABCC and RERF authored a number of monthly and annual periodical publications to convey information. These publications include: Annual Reports-a complete summary of operations from July 1 to June 30; Technical Reports-the results of original research from scientific investigations; Research Protocols-approved scientific procedures to be used in investigations; Commentary And Review (RERF only)-replaced the Technical Report series; RERF Update-news publications containing non-scholarly lbs about the organization; RERF News Letter-internal news for employees. The sub-series is organized by the type of publication and then by date.

### Subseries MS067-S1ss2: Subseries II: Scholarly Journal Reprints

Scope and content: Scope and Content Note: This subseries contains reprints of scholarly journal articles authored by one or more ABCC/RERF scientists, reprints of Japanese scientists not affiliated with ABCC/RERF, and reprints by United States government agencies about the effects of the atomic bombings on human health. Reprints of Dr. Schull's scholarly journal articles are located in the following Series III along with his other scholarly works. The reprints are arranged by subject. Some of the papers have suffered flood damage.

#### **Subseries MS067-S1ss4: Subseries IV: Correspondence**

Scope and content: Scope and Content Note: This subseries includes correspondence to and from W. J. Schull about the ABCC/RERF, created during his service to the organization. The subseries is arranged by correspondence to W. J. Schull, to W. J. Schull and Vickie Schull, from W. J. Schull, between W. J. Schull and another, and lastly copies of correspondence from others that were in Dr. Schull's papers. Where possible, the correspondence between W. J. Schull and another has been arranged together to allow the researcher to see both sides of the interchange on a single topic. Within these groupings, correspondence is arranged alphabetically by the last name of the sender or recipient. Some of the correspondence is RESTRICTED. Consult an archivist for access.

<b>Subseries MS067-S1ss5: Subseries V: Administration</b>			
<p><u>Scope and content:</u> Scope and Content Note: This subseries includes interoffice memorandums, reports and other records about the administration of the ABCC/RERF collected by Dr. Schull. Administration of the ABCC/RERF included such functions as budgeting and capital funds, legal and contractual issues, staffing, salary administration, record keeping for employees, research statistics maintenance, information technology including the organization of medical data bases to support research, employee recognition, public relations, printing and publishing, and employee and community social activities. The records concern operations in Hiroshima, Nagasaki and Kure. The records are organized by creation date earliest first. Dr. Schull kept his Department of Genetics papers in three ring binders. The papers have been removed from the binders due to flood damage. The original order and notebook tabs have been preserved. Many of these papers have substantial flood damage.</p> <p><u>Publication status:</u></p> <p>Published</p>

### Subseries MS067-S1ss6: Subseries VI: RERF Committee Meetings

Scope and content: Scope and Content Note: As a department head and executive, Dr. Schull attended a number of committee meetings at RERF during his stays in 1986-1987, 1990-1991, and 1996-1997. Dr. Schull participated in the Executive and Operating Committees, Human Investigation Committee, and the Planning Committee in these years. Typically, each folder contains Dr. Schull's handwritten notes from the meetings and the typewritten papers prepared by staff for the meeting including agenda, minutes from prior meetings, and papers providing important background for the agenda topics. The papers are arranged by meeting title and then by date.

### Subseries MS067-S1ss7: Subseries VII: Events

Scope and content: Scope and Content Note: Events at ABCC/RERF typically involved participants from outside the organization and included Scientific Committee Meetings, Scientific Conferences, International Congresses, Symposiums, Program Reviews, and Consultants Meetings. The material is arranged by meeting date. Folders variously contain correspondence between parties responsible for arranging the meeting (many times Dr. Schull was consulted on draft agendas), travel grant applications, itineraries, travel arrangements, travel receipts, meeting agendas, attendee lists, presentations by Dr. Schull and others, invitations to social events conducted as part of the main event. Some files in this subseries are RESTRICTED due to the presence of exposed survivors' names or the presence of Japanese professional curriculae vitae. Consult an archivist for access.

**Subseries MS067-S1ss10: Subseries X: Research Analysis**

Scope and content: Scope and Content Note: This subseries contains drafts of papers about research results that were under consideration for publishing as a Technical Report. Dr. Schull was an integral member of the peer review process for draft research analysis. Many of these papers were sent to him for his review. Dr. Schull was one of the authors for some drafts. The papers are organized by ABCC/RERF research subjects adapted from Annual Reports, then by date.

### Subseries MS067-S1ss11: Subseries XI: Radiation Testing, Marshall Islands

Scope and content: Scope and Content Note: This subseries contains correspondence, research, publications, news clips, and other records collected by Dr. Schull about the effects of radioactive fall-out from the BRAVO (also Castle BRAVO) nuclear bomb test, March 1, 1954, on Japanese sailors on the fishing boat, Fukuyru Maru, and Marshallese residing on Rongelap, Rongerik, Alinginea, and Utirik atolls. These papers are arranged at a box level using Tier 1 Processing. They are in good condition and remain in the original binders and order received from Dr. Schull.

### Subseries MS067-S1ss12: Subseries XII: News Clips And Other Non-Scholarly Articles

Scope and content: Scope and Content Note: This subseries contains news clips and other non-scholarly articles about the ABCC/RERF collected by Dr. Schull. The ABCC/RERF Translation Office translates Japanese press articles into English and sends them to ABCC/RERF senior executives and staff. This subseries contains translated and untranslated news clips. News clips from both Japan and the United States are included. The Japanese news media interviewed senior ABCC/RERF executives such as George B. Darling and Dr. Schull. Transcripts and news clips about interviews are included here. News clips are organized by the name of the newspaper and then by date order.

AVF.MS067.001	<b>File - Study of Inbreeding of Island Kuroshima</b> <i>Physical storage:</i> MS 067 – Box: AVF <i>Physical storage:</i> Folder: - <i>Scope and content:</i> The first few minutes comprised mostly of medical testing. The rest of the film comprised of a trip to Kuroshima island (ten miles west of Sasebo, Nagasaki Prefecture) for some more medical testing and documentation of residents for inbreeding. There is no sound. <i>Conditions governing use:</i> Creative Commons License 4.0, Attribution-NonCommercial-NoDerivs. Images are to be used for educational purposes only, and are not to be reproduced without permission from The TMC Library, McGovern Historical Center, 1133 John Freeman Blvd, Houston, TX, 77030, mcgovern@library.tmc.edu, 713-799-7899	circa 1960	1 16mm reel

### Series MS067-S2 : Series II: Editorial Positions and Peer Reviews;

Date: 1983-1991 (creation)

Scope and content: Scope and Content Note: This small series contains material that reflects Dr. Schull's role as a mentor, teacher, and editor for other scientists' research. Dr. Schull held a number of editorial positions for scholarly journals. His input into other's scholarly work was widely respected and frequently solicited as part of the peer review process at various institutions. The series is organized by reviewed monographs, editorial boards, and reviewed journal articles. The lbs represent only a small part of Dr. Schull's work in this capacity.

**Series MS067-S3 : Series III: Scholarly Works;**

Date: 1953-2000 (creation)

Scope and content: Scope and Content Note: This series contains monograph drafts and periodical reprints of scholarly works authored by Dr. Schull, alone or with others, as well as copies of some of Dr. Schull's published work that is not already cataloged in the Texas Medical Center Library. The series is organized by: monograph drafts, scholarly journal reprints grouped by subject, book reviews of published works, and unpublished works.

**Series MS067-S4 : Series IV: Radiation Research, Governmental and Non-Governmental Bodies;**

Date: 1980-2002 (creation)

Scope and content: Scope and Content Note: This series contains correspondence, meeting minutes, draft papers, presentations, travel arrangements and receipts, and other text documents related to Dr. Schull's work for various governmental and non-governmental scientific committees. Dr. Schull was an executive or an advisor on most of these committees so the papers reflect his work as an administrator and

committee leader for many other scientists performing or consolidating the actual research. The material is arranged and described at a box level. The material is arranged alphabetically by the committee title.

### **Series MS067-S5 : Series V: Genetics Research, Governmental and Non-Governmental Bodies;**

Date: circa 1990s (creation)

Scope and content: Scope and Content Note: This series contains correspondence, meeting minutes, draft papers, presentations, travel arrangements and receipts, and other text documents related to Dr. Schull's work for various governmental and non-governmental scientific committees. Dr. Schull was an executive or an advisor on most of these committees so the papers reflect his work as an administrator and committee leader for many other scientists performing or consolidating the actual research. The material is arranged and described at a box level. The material is arranged alphabetically by the committee title.

### Series MS067-S6 : Series VI: Expert Witness In Litigation;

Date: circa 1990s (creation)

Scope and content: Scope and Content Note: This series contains correspondence, court documents, travel arrangements and receipts, and other text documents related to Dr. Schull's work as an expert scientific witness for major cases about the damage that exposure to radiation may or may not have caused to human health. The material is arranged and described at a box level. All of the material is RESTRICTED due to the use of victims names. Consult an archivist for access.

**Series MS067-S7 : Series VII: Collected Publications;**

Date: 1958-2007 (creation)

Scope and content: Scope and Content Note: This series contains scientific publications from governmental and non-governmental bodies and a few single authors about the effects of radiation on the environment and human health. Dr. Schull collected this information during his work as an expert in this field. Many of these publications may no longer be publicly available. The publications are arranged in alphabetical order by governmental body.

### Series MS067-S8 : Series VIII: Personal Papers;

Date: 1947-2005 (creation)

Scope and content: Scope and Content Note: This series contains personal correspondence, certificates of fact, and ephemera related to international travel and hobbies collected by Dr. Schull and his wife Vickie.

Publication status:

Published

#### File / item list

Reference code	Title	Dates	Physical description
gi203664303	<b>File - Correspondence Between W. J. Schull and Patterson, Pat, Mrs. About A Religious Question;</b>  <i>Physical storage:</i> Box: 117  <i>Physical storage:</i> Folder: 1	1956 January 3, 20.
