NATIONAL NETWORK OF LIBRARIES OF MEDICINE, SOUTH CENTRAL REGION REGIONAL MEDICAL LIBRARY CONTRACT AWARDED

From left: Melissa Salas, Renee Bougard, Karla Bourque, Dr. J. Robert Beck, Ruicha Mishra, Carrie Rogers, and Gretchen Schweiger (missing Greg Bodin)

We are pleased to announce that the Houston Academy of Medicine–Texas Medical Center (HAM-TMC) Library has retained the Regional Medical Library designation in the National Network of Libraries of Medicine for the South Central Region (NN/LM SCR). The five year contract was awarded on May 1, 2001 and will end on April 30, 2006. The program consists of 5 basic areas: Network development and document delivery, outreach to health professionals and special populations, consumer health,

technology, and education. Evaluation of the NN/LM SCR programs and services, as well as those developed and provided by subcontractors, will be an integral component in this contract.

An additional outreach coordinator position has been added to this contract, which will focus on outreach to special populations to include, but not limited to, Hispanics, African – Americans, Native American/American Indians and the HIV/AIDS community. Outreach to special populations will be a major focus of the contract. Many of the publications produced by the NN/LM SCR and its outreach subcontractors will be translated by a team of Spanish-speaking translators and placed on the NN/LM SCR web site to meet the growing need for Spanish-language health information resources. Outreach will also target specified health professional groups each year, to include public health professionals, specific allied health groups, nurses, veterinarians, dentists, and alternative medicine practitioners.

A number of awards and equipment opportunities will be made available to Network members. These include access to electronic consumer health information, access to information for the public health community, technology awareness conferences, library improvement projects, and Internet connectivity projects.

The NN/IM SCR has a Regional Advisory Committee (RAC) that serves in an advisory capacity to the staff in identifying regional needs, populations, and existing programs throughout the region, and in providing feedback and evaluating programs and services. Kathy Hofman, MLS, Director, UT MD Anderson Cancer Center Research Medical Library, Houston TX, will serve as the NN/IM SCR RAC Chair, 2001 – 2003.

Beyond Wired: Wireless Technology and Health Information

The 5th Annual Houston Conference on Health Informatics was held on June 7th, 2001 in the Kleberg Auditorium at Baylor College of Medicine. J. Robert Beck, MD, Program Chairman and Interim Executive Director of the HAM-TMC Library, welcomed the audience and gave the opening remarks.

*Rebecca Whitehead Munn
Cisco Systems*

*James W. Suliburk, MD
Handheldmed.com, LLC*

*Deborah Halsted, MLS, MA,
and J. Robert Beck, MD*

Presentations included: Rebecca Whitehead Munn, Vice President for Healthcare Practice, Internet Business Solutions Group, Cisco Systems, *Strategies for Success in the Internet and Mobile Economy*; James W. Suliburk, MD, Co-founder of Handheldmed.com, LLC, *Handheld Medicine-An Introduction to the Use of PDA's in Clinical Practice*; J. Robert Beck, MD, and Deborah Halsted, MLS, MA, Director of Library Operations, *Links from the Links: A Future Scenario for Wireless Technology and the Medical Profession*.

*Jack Smith, MD, PhD, Leah Krevit, MLIS,
and Richard Cone, MD, PhD*

A panel response and audience questions followed each presentation. Participating panelists included: Lynne Nguyen, MPH, Program Manager, Asian American Diabetes Education Project, Harris County Hospital District; Leah Krevit, MLIS, Director of Information Resources and Technology, University of Texas Health Science Center at Houston (UTHS-C), Dental Branch; Jack Smith, MD, PhD, Professor and Chair of the Department of Health Informatics School of Health Information Sciences UT-HSC-H; Richard W. Cone, MD, PhD, Associate Director for IT

Research, HAM-TMC Library Associate Professor, Baylor College of Medicine; Dennis Moser, MLIS, Web Librarian, HAM-TMC Library; Felicia M. Little, MLIS, Web Librarian, HAM-TMC Library.

*Felicia M. Little, MLIS, Dennis Moser, MLIS
and Lynne Nguyen, MPH*

NEW JOURNAL SUBSCRIPTIONS

The HAM-TMC Library is currently in the process of ordering nearly 40 additional journal titles for its collection of more than 2000 periodical subscriptions. The list of new titles includes the following:

<i>Alimentary Pharmacology and Therapeutics</i>	<i>Infectious Diseases in Obstetrics & Gynecology</i>	<i>Journal of the International Neuropsychological Society</i>
<i>Ambulatory Pediatrics</i>	<i>International Journal of Trauma Nursing</i>	<i>Liver Transplantation</i>
<i>American Journal of Rhinology</i>	<i>Journal of Biomolecular NMR</i>	<i>Menopause: Journal of the North American Menopause Society</i>
<i>Bioinformatics</i>	<i>Journal of Clinical Virology</i>	<i>Molecular Human Reproduction</i>
<i>Canadian Journal of Cardiology</i>	<i>Journal of Diabetes and Its Complications</i>	<i>Neuromuscular Disorders</i>
<i>Cellular Microbiology</i>	<i>Journal of Endovascular Therapy</i>	<i>Paediatric Anaesthesia</i>
<i>Clinical Autonomic Research</i>	<i>Journal of Heart Valve Disease</i>	<i>Physiological Genomics</i>
<i>Clinical Neurosciences</i>	<i>Journal of Interventional Cardiology</i>	<i>Prehospital Emergency Care</i>
<i>Cloning</i>	<i>Journal of Medical Biography</i>	<i>Respiratory Care Clinics of North America</i>
<i>Criticas: An English Speaker's Guide to Current Opinion in Critical Care</i>	<i>Journal of Nursing Measurement</i>	<i>Surgical Infections</i>
<i>Current Opinion in Neurology</i>	<i>Journal of Telemedicine & Telecare</i>	<i>Traffic: The International Journal of Intercellular Transport</i>
<i>Diabetes Obesity & Metabolism</i>		<i>Transplant Infectious Disease</i>
<i>Drugs & Aging</i>		
<i>Genetic Testing</i>		
<i>Glycobiology</i>		

About half the titles were requested by faculty, physicians, staff and students from within the Texas Medical Center. Whenever possible we have sought to honor these requests, deciding against requests only when they were clearly outside the scope of our collection. Likewise, we also turned down requests for titles already held by one of the members of the Texas Health Science Libraries Consortium, which include the libraries of the UT Medical Branch in Galveston, the UT MD Anderson Cancer Center, the UT Houston School of Public Health, the UT Houston Psychiatry Branch, and the UT Houston Dental Branch.

The other titles were suggested by members of the HAM-TMC Library staff based on information we have received regarding new titles, as well as our day to day interactions with clients at the reference desk and in the Interlibrary Loan office. All titles were reviewed by members of the Library's professional staff, who rated each title regarding its perceived relevance / usefulness. Only highly rated staff suggestions were included.

Whenever possible we will be purchasing electronic access along with the print title. For the most part we will be purchasing volumes for the current year forward. At this point we do not intend to purchase back volumes for titles unless the titles have started within the past two years.

The HAM-TMC Library receives purchase requests for books and journals on a regular basis. In most cases book purchase requests are processed right away, provided that the requested title is within the scope of the Library's collections.

Journal titles are different, in that unlike book purchases they tend to be significantly more expensive. Likewise, they represent an ongoing commitment of Library funds, whereas most book requests are one-time purchases. Consequently, requests for journal titles need to be evaluated *en masse* once or twice a year. The titles currently being ordered are the first to have been subjected to a comprehensive review by Library staff. We will be reviewing titles again at the end of the current calendar year and every six months thereafter.

Requests for books and journals, as well as comments and questions, may be directed to: Richard P. Jasper, M.In., Assistant Director for Collections, 713-799-7126, richardj@library.tmc.edu.

NOTEWORTHY

Remote Access to Library's Electronic Collections

The server that provides the Library's Remote Access Service (RAS) was destroyed by recent flooding. We have not determined how long it will take to rebuild the system, but as soon as it is available it will be announced on the Library's Webpage.

Please note that most HAM-TMC Library electronic journals and databases can be accessed from computers located in TMC educational institutions as well as in the following libraries:

- MD Anderson Cancer Center Research Medical Library
- UT Dental Branch Library
- UT Psychiatry Library
- UT School of Public Health Library

Finally, if you use one of the TMC educational institutions as your Internet service provider (ISP), you can access most HAM-TMC Library electronic journals and databases without using RAS.

Recovery

As a result of Tropical Storm Allison, the Library is recovering from extensive flood damage. The Library re-opened on June 14, 2001 and is currently operating with shorter hours and reduced services, but expects to be back to regular hours in a couple of months.

WELCOME

Greg Bodin is the new Technology Coordinator of the NN/LM SCR office. Greg is a Louisiana native and resident of New Orleans. He received his MLIS from Louisiana State University in 1994. In addition to previous experience as a systems librarian at the Ochsner Medical Foundation in New Orleans, Greg has also worked as a branch manager in the Ascension Parish Library system in Louisiana and as a business/science librarian at the Memphis/Shelby County Public Library in Memphis, Tennessee.

Greg will continue living in New Orleans, telecommuting with the RML office in Houston.

LIBRARY LINES

Library Lines is published six times per year. Please call (713) 799-7169 to be placed on our mailing list.
