Hot Topics: Library Closed on Labor Day; Diagnosaurus: A Differential Diagnosis Resource; RefWorks Update; Featured Classes in September

Library Closed on Monday September 1st

The Library will be closed on Monday, September 1st in observance of Labor Day. Regular hours resume Tuesday, September 2nd.

Diagnosaurus: A Differential Diagnosis Resource

McGraw-Hill's *Diagnosaurus* 2.0, a differential diagnosis tool, is available from [Access Medicine](#). *Diagnosaurus* allows you to search more than 1,000 common diseases and disorders by:

- Symptom
- Disease
- Organ system
- All entries

Diagnosaurus (2.0) is derived from McGraw-Hill's 2007 Current Consult: Medicine.

You can access *Diagnosaurus* by looking it up in the Library's Databases list or from within [Access Medicine](#). Once in Access Medicine, click the blue DDx tab at the top of the page or the icon for *Diagnosuarus* further down.

[Access Medicine](#) is available to users at the Educational and Clinical Partner levels.

RefWorks Update

[RefWorks](#) users are invited to log in to *RefWorks* to read in detail about a number of enhancements just released. These include:

- **Enhanced Global Edit:** move, delete or replace data throughout your references
- **Author links** to COS Scholar Universe: when viewing references in Standard or Full View, and when using RefShare, a star icon indicates a potential match with an author profile in COS Scholar Universe
- **A drop-down Output Language setting at the individual reference level** which will allow *RefWorks* to apply special reference-specific formatting in more languages
- **PubMed ID (PMID) and PubMed Central ID (PMCID) fields** have been added for all references

- Users of **Jaws** or **MS Narrator screen readers** will now be able to establish a compliant interface default in the **Tools, Customize** area- see the **RefWorks and Accessibility** section of Help
- **PubMed links** are now activated in RefShare when you enable PubMed Linking via the Tools, Customize area

To access *RefWorks* go to the Library website, click on databases, search for *RefWorks*. Sign up for an individual account if you haven't done so yet and you are ready to start using *RefWorks*.

Want to learn how to use the software? A free class is scheduled on September 17, 2008 from 10:00 -12:00. Register to attend at:
