From the Chair of the Board of Directors

It has been my pleasure to serve at the Chair of the Board of Directors, which serves in a governing capacity for The Texas Medical Center Library. During this past year, the Board has been active on many fronts including the approval of a strategic plan, a new base assessment model, a new library logo and a new doing business as name, The Texas Medical Center (TMC) Library. The Board was very active in assisting Dr. Buja and his staff in securing the next five-year contract for the Library to serve at the National Network of Libraries of Medicine South Central Region, especially in meeting with the site-visit team in December 2010. In the past fiscal year, the Friends of the TMC Library, under the leadership of Dr. John Wolf, have once again become active in fundraising by hosting two events with the proceeds going to the Mary and Ben Anderson fund for staff development. Both of these events were very ably chaired by Dr. Herb Fred, also a member of the Friends Board.

I have greatly enjoyed working with Dr. Buja and Library staff, especially in major projects such as the creation and approval of the new base assessment model. As a member of the Board and the Library's Finance Committee, I was able to provide input in the creation of the model and to lead the Board in voting for acceptance. In the coming year, I look forward to continuing to serve on the Board and Finance Committee, assisting Dr. Buja and the new Board Chair, Dr. Richard Wainerdi, in leading The TMC Library in becoming one of the best and largest academic medical libraries anywhere.

Eric Malmberg, EdD, MBA, MED

The Library is the most efficient, essential and convenient tool for researchers to conduct day-to-day research. We all appreciate your efforts and contributions!—

From the Executive Director

FY 2010-11 has been a year of progress and opportunity for the Houston Academy of Medicine-Texas Medical Center (HAM-TMC) Library. With approval of the Board of Directors, we are now doing business as The Texas Medical Center (TMC) Library. We have a new logo that presents our core theme *Information for Life*. Please see our new sleeker and very functional home [web page](#), our window to the world. We welcome your comments about our new look.

I have a strong conviction that the success of an organization requires commitment to certain basic principles, particularly a focus on core mission and attention to accurate information (data) to inform operations. To that end, we have implemented a new institutional matrix model for fiscal relations with our governing and supporting TMC institutions. The model is based on key institutional characteristics, including seats on the Board of Directors, size (number of faculty and students and administration – principle FTEs), relation to The TMC Library as the principle medical library for the institution, and usage data, both on-site usage as well as electronic and remote access usage. This model is now providing an accurate and objective approach for determining each institution's equity in the operations of The TMC Library. Additionally, the accurate determination of electronic usage is a complex process that has required our TMC institutions to commit to remote access log on for access to the library's resources (with an associated cultural issue related to individual management of multiple passwords) as well as the development of a detailed methodology for analysis of usage (measured in megabytes) by our Information Technology staff, a project that took over two years to bring to fruition. This is a good

example of the complexities of the *Information Age* in which we are now functioning.

Our data indicate that usage of the Library's resources, particularly electronic resources, continues to increase while multiple factors have served to constrain The TMC Library's ability to increase the operational budget to meet regular increases in subscription fees from publishers and vendors to maintain current subscriptions to meet a base goal much less to add subscriptions to additional publications regularly requested by our constituents. On the positive side, we continue to obtain discounted pricing for many of our resources based on the reputation of The TMC Library as a major medical library and our participation in purchasing consortia, particularly The University of Texas System Digital Library (UTSDL).

A major highlight of the year is that we have been successful in a competitive renewal to continue as the South Central Regional Medical Library of the National Network of Libraries of Medicine supported by a five- year contract from the National Library of Medicine (NLM). This renewal will allow us to continue to lead a coalition of sixteen resource libraries in the five-state area (Texas, New Mexico, Oklahoma, Arkansas and Louisiana) in conducting programs to provide quality public health and medical information to numerous professionals and the general public in our catchment area. We are very proud of this achievement.

We also have made progress in the related arenas of development and fundraising. The Friends of the TMC Library have been quite active this past year, including the hosting of two successful fundraising events held at The TMC Library. The Friends have designated the proceeds from these events for professional development of our library staff. These efforts are much

appreciated. In addition our Library development efforts have yielded significant funding from several foundations, including the Brown Foundation, the McGovern Foundation and the Fondren Foundation. Some of these funds have been used to allow the Library to acquire the complete electronic backfiles of the *New England Journal of Medicine* and the *Journal of the American Medical Association* and its affiliated specialty *Archives* series.

In the *Information Age*, the form and function of libraries are undergoing rapid and perhaps revolutionary change. While access to resources electronically via the Internet is now crucially important, there is a consensus among librarians and knowledge management experts that libraries also continue to need to exist in physical form. The use of our physical library by students as well as faculty and others continues to be active. However, the physical form of the Library needs to take on a functional architecture to meet current and future needs of our constituents. The last major renovation of The TMC Library occurred in 1997 supported in a large part by a \$1.5 million grant from the Houston Endowment. We have determined that now is the time for a major revamping of The TMC Library in the Jesse H. Jones Building to transform our Library into a 21st century Health Information Center/Library. As a start on this ambitious goal, we have conducted a competitive review of firms to conduct an Architectural Planning Project. We have selected HB+M of Cleveland, OH, a leader in library design, in partnership with Redding Linden Burr, a Houston-based firm with expertise in mechanical and electronic systems, as well as GLMLV, a local architectural firm. We have obtained funding for this first phase with generous support from the Friends of the TMC Library and the Fondren Foundation. This architectural planning project, with input from multiple internal and external constituents of The TMC Library, will be a major focus for 2012.

In summary, 2011 has been a very successful year for The TMC Library. Our future activities will be based on our previous success as well as a 2012-2015 Strategic Plan which we completed this year. In closing I want to express my deep thanks and appreciation for the work of The TMC Library staff and the support of our Board of Directors and the leaders and members of our constituent TMC institutions. Thank you and all the best!

L. Maximilian Buja, MD
Executive Director

The Texas Medical Center Library

Administration

Architectural Study

In July, the Library distributed a request for qualifications (RFQ) to eight architectural firms identified by *Library Journal* as the best firms in library design. The purpose of the RFQ was to identify a firm to assist the Library in conducting usage surveys and focus groups of library staff and stakeholders to determine the direction for a total library redesign. Two firms will make presentations in September 2011, following which one will be selected. Funding for this project has come from the Fondren Foundation and the Friends of the TMC Library. A capital campaign will follow to raise the funds to renovate the Library based on user input.

Base Assessment Model

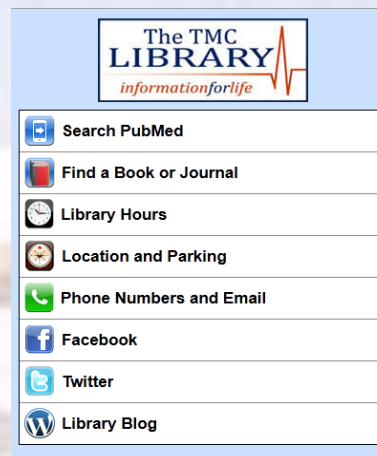

In September, the Library's Board of Directors approved the new base assessment model for Governing and Participating member institutions. This model more logically calculates assessments based on actual library usage, both physical and electronic. This new model will be implemented gradually over three years to allow those institutions who will be assessed at a higher rate time to work the additional costs into their budgets.

Fund Raising

An active Fund Raising Committee was formed, and the Library received funding for important projects in the last fiscal year. Donors include:

- The Brown Foundation, Inc.
- Cynthia & George Mitchell Foundation
- Friends of the TMC Library
- John P. McGovern Foundation

Mobile Website

The Library launched a new mobile website in January 2011. Since that time the site has logged an average of 1,000 unique visitors a month, with an average of 300 visitors using the site multiple times. The highest percentage of usage is from iPads and iPhones. The site has been accessed from twenty-two countries around the world and from twenty-two states in the U.S.

Strategic Plan

The Library's Board of Directors voted to approve the Library's new strategic plan in June. The vision is that *The TMC Library is recognized as a world-class leader in the delivery and development of biomedical information*. The goals to reach this vision are:

- Collect, Provide and Conserve Biomedical Information
- Teach Strategies and Develop Techniques for Knowledge Management
- Provide a Center for Study, Research and Collaboration
- Implement Public Relations and Marketing Strategies

Circulation

Access Control System

In order to efficiently collect the demographic Library usage data needed for the new base assessment model, the Library contracted with Johnson Controls, Inc. to create an access control system that will scan institutional badges at entrance and exit points. This project will be completed early next fiscal year and will allow the Library to accurately report use of the physical library space to the Board and participating institutions.

Inventory Project

In May staff began to inventory all items in the book stacks. This project has enabled the Library to update holdings in the online catalog and is the first in the process of evaluating Library space and retention of print materials.

Jesse Gonzalez, Circulation Manager, checking out a book

The TMC Library is a valuable resource for all the learners at Baylor College of Medicine—Stephen B. Greenberg, MD, Dean, Medical Education, Baylor College of Medicine

As both a faculty member and an administrative leader, I am very grateful for The TMC Library and all of you who work there – you make the TMC a much better place, and I can't imagine working here without the Library and its staff. Thanks for everything.— George Stancel, PhD, Dean, Graduate school of Biomedical Sciences and Executive Vice President for Academic and Research Affairs, UTHealth

Collection Development

After budget cuts in FY 2009-10 that necessitated the cancellation of some resources, the Library was able to maintain the collection at its present level for FY 2010-11. Thanks to the *Academic Library Collection Enhancement Program (ALCEP)* of the University of Texas Digital Library Consortium (UTDLC), the Library's users gained access to over 4,000 e-books in the fields of medicine, biomedical and life sciences, chemistry, materials science, behavioral science, mathematics and statistics from Springer, one of the world's top scientific publishers.

The Library's institutional repository, *DigitalCommons@The Texas Medical Center*, added considerably to its contents during the year. The Graduate School of Biomedical Sciences at UTHealth continues to deposit electronic theses and dissertations, and these are among the most highly used documents in the repository. Users also have access to theses and dissertations from two other UTHealth schools, the School of Nursing and the School of Public Health. The Library became a publisher in 2010 when it agreed to publish and host the newly established *Journal of Applied Research on Children (JARC)* from the Children at Risk Foundation. A second, associated publication, the *Journal of Family Strengths*, will be hosted and published by the Library as well.

Throughout FY 2010-11 the department accepted donations of books and journals for HELP, a charitable program established by American students to fill the needs of libraries in Africa. To date thousands of volumes have been sent to a medical school in The Gambia, West Africa.

JARC, a new peer-reviewed journal published by the TMC Library

Highest-Use Databases, FY 2010-11

Access to the library paid subscriptions to electronic journals is critical to the success of our ongoing research activities. We are all amazed and thrilled at the ability to access so much information so easily. The ability to have such easy access to so much information helps us move our research forward at the maximum possible pace.—Rodney E. Kellems, PhD, Chair, Biochemistry and Molecular Biology, UTHealth

Information Technology/ Institutional Relations

This year has been a testament to doing more with less within the Information Technology (IT) Department.

All of the publicly-accessible computers required hardware and software upgrades. The upgrades to *Windows 7* and *Office 2010* necessitated a reconfiguration of the current machines in order to run these programs. In the first floor labs, the RAM was replaced with four GB of memory, and solid state drives were installed to speed up the systems. Staff used the memory and hard drives removed from the first floor systems to increase speed and add another year of life to the computers in the street-level laboratory.

FY 2010-11 marked the first year that the Library calculated organizational assessments using the model approved by the Board of Directors in spring 2010. This assessment model groups together like institutions and bases assessments on the richness of resources available to them via their institutional usage profiles for physical and remote electronic usage of resources.

In addition to assessment modeling support and IT infrastructure maintenance, the department continued the data collection and business analysis statistics pertaining to electronic resource usage.

John P. McGovern Historical Collections & Research Center

Eugene Kahn, MD

McGovern Center staff completed cataloging the more than 200-volume collection of Eugene Kahn, MD (1887-1973). Dr. Kahn was Professor Emeritus in the Psychiatry Department of Baylor College of Medicine (BCM) and a research associate in psychiatry at the Houston State Psychiatric Institute (University of Texas Mental Sciences Institute). Many books in this collection are important late-19th and early-20th-century German works on psychiatry by Emil Kraepelin, P. J. Mobius and Carl Jung.

The 2009 edition of *The Red Book (Liber Novus)* was an important addition to the collection this year. This facsimile and translation of Jung's self-illustrated work is significant to both the Kahn and Menninger Collections.

The Library became a co-sponsor of the Houston History of Medicine Society which presents monthly lectures during the academic year and the annual *John P. McGovern Lecture and Banquet*. Students who write papers on a history of Medicine topic receive bibliographical research assistance from the McGovern Center.

The Historical Research Center (HRC) has hosted numerous scholars and journalists from throughout the U.S. and Japan in the past year. Visitors included a delegation representing the Japan Society for the Promotion of Science, a *Kyodo News* journalist on a fellowship to Yale, a Library of Congress researcher and a PhD candidate from Carnegie Mellon studying the history of the TMC. These researchers spent from a week to a month studying in the archives.

HRC staff continue to work at clearing out the backlog of various collections and finding homes for orphan items. New collections continue to arrive, among them the papers of Thomas Matney PhD, Vernie Stembbridge MD, Richard S. Ruiz MD, and the *Texas-Mexico Border Project* from the UTHealth School of Public Health.

HRC staff also created a new blog, [The Black Bag: Foundations of Medicine](#) which reveals interesting tidbits about the materials in the HRC

Page from *The Black Bag: Foundations of Medicine*

Thank you for helping me locate rare photos of syphilis from a dermatology perspective. The experience in itself gave me a new perspective on the rare books collection. Syphilis is an example of a historically common disease that has become rare in the advent of modern medicine. Today's challenge is making the correct diagnosis having not seen its unusual presentations, and the rare books room held the keys to the answers. As a result, you turned a nearly failed venture into a success. Dan Kelly, MD, Resident, BCM

National Network of Libraries of Medicine South Central Region

The TMC Library is under a five-year contract with NLM to serve as the regional headquarters of the National Network of Libraries of Medicine South Central Region (NN/LM SCR). The 2006–2011 contract ended on April 30, 2011, and activities for much of the year revolved around competing against the University of Texas Southwestern Medical Center Library in Dallas for the 2011–2016 contract. As part of the competition process, NLM staff and members of the proposal review team attended a site visit at the Library on December 7, 2010. Additionally, numerous budget and programming negotiations occurred during the winter. In April 2011, the Library was awarded the 2011–2016 NN/LM SCR contract.

The mission of the NN/LM SCR is to advance the progress of medicine and improve public health by providing all U.S. health professionals and the general public in the South Central Region (Arkansas, Louisiana, New Mexico, Oklahoma and Texas) with access to biomedical information. This mission is fulfilled through a variety of activities including training, exhibiting and providing funding opportunities for librarians, healthcare professionals and members of community-based organizations throughout the region.

NN/LM SCR staff conducted eighty-one workshops and presentations to 1,500 healthcare professionals, librarians and members of the public. Eight of these presentations occurred at regional library conferences. Staff demonstrated and promoted NLM databases at three national conferences, including meetings of the American Academy of Dermatology and the National Congress of American Indians. The NN/LM SCR provided over \$450,000 in funding for a variety of projects including outreach to underserved communities, professional development and digitization of historic materials.

Two large-scale needs assessment projects were completed. Information obtained during the *Public Library Needs Assessment* project will help the NN/LM SCR to assist regional public libraries after a disaster. The *Health Disparities Task Force* examined the use of health information resources and technologies by racial and ethnic minority populations.

NN/LM SCR staff (from left): Cheryl Rowan, Re Mishra, Karla Bourque, Emily Hurst, Karen Vargas, Michelle Malizia, Melissa Salas, Carrie Rogers

Reference and Outreach

Have you *liked* the Library on [Facebook](#) yet?

Do you follow us on [Twitter](#)?

The TMC Library Reference and Outreach Department uses today's social media outlets to share events, interesting news items, and other relevant content with patrons locally and around the world. In the last year our Facebook posts have been viewed 24, 599 times by users from Venezuela to Lebanon, and we have 318 Twitter followers. While the Reference and Outreach staff still answer questions in person, via telephone and email, our electronic chat reference service continues to grow. Our chat transactions increased 66% this year, and in January 2011 we expanded our available hours to Monday – Friday, 9:00 a.m. – 5:00 p.m. Education programs for TMC institutions remain a vital part of departmental activities. Over 2,200 students, faculty and staff members attended library orientations, classes or customized instructions sessions this year.

Outreach is an important function for The TMC Library, and the Reference and Outreach Department spearheads these efforts. Under a subcontract with the NN/LM SCR, staff exhibit at health fairs such as the *Senior Health Expo* in Lufkin, TX and professional events like the *American Association of Endocrine Surgeons Conference*, held in Houston. In FY 2010-11 Reference and Outreach personnel staffed eight exhibits reaching almost 600 consumers and healthcare professionals. Staff taught eleven classes to 205 consumers and healthcare professionals on the use of PubMed, MedlinePlus, NIH Senior Health and other valuable NLM resources. Outreach efforts also include partnering with Houston area community-based organizations like the Vietnamese Civic Center, the Chinese Community Center and De Madres a Madres to gain NN/LM SCR-funded health information access awards that provide computer equipment and instruction to help these organizations and their clients to access unbiased, quality health information from trusted NLM resources.

The TMC Library's Facebook Page

The research capabilities and trained research library staff at The Texas Medical Center Library are an incomparable, international resource that is improving health care throughout the world.—
John Kanander, Senior Vice President, Texas Medical Center, Inc.

Library Activities

Helena Michie with the exhibit

Exhibits

The Library hosted the NLM exhibit *The Literature of Prescription: Charlotte Perkins Gilman's The Yellow Wall-Paper* from May 29-July 9, 2011. As part of this display, Helena Michie, Professor of English, Rice University, presented a lecture entitled *Victorian Madness and Women*.

Ethics Series

Continuing its partnership with The McGovern Center for Humanities and Ethics of UTHealth, the Library offered three lectures on medical ethics.

- *Reflections Upon Galetea*, John Lienhard, PhD,
- Panel Discussion, *Medical Ethics, Eugenics and the Holocaust*, Rabbi Samuel Karff, Daniel Cardinal DiNardo, Sheldon Rubinfeld, MD, Thomas Cole, PhD, Moderator
- *Clinical, Ethical and Genetic Implications of Two Atomic Bombs and Beyond*, Tomoko Steen, PhD

NIMS ICS Training

In June, representatives from the Brazoria County *Homeland Preparedness Project* conducted classes on the National Incident Management System (NIMS) *Incident Command System (ICS)* for members of the Library's Disaster Team. *ICS* offers a standardization of method in responding to disasters and is a requirement for eligibility for post-disaster federal funding.

Scholarly Communications Forum

The Library co-sponsored the second annual *Scholarly Communications Forum*, held at Rice University. The topic this year was *Library Space: Evolving the Way We Use Physical and Virtual Spaces*. This event grows every year, with librarians attending from as far away as Beaumont, Lake Jackson, Huntsville, Denton, Stafford, Kingwood, Angleton, College Station and Clute, Texas. The keynote speaker was Wendy Heger, Houston Public Library, and panelists and roundtable leaders from different types of libraries discussed new uses of library space.

Wendy Heger presenting on Green Library Buildings

Wellness Committee

Donna Evans, Chair, Wii bowling

The Library formed the Wellness Committee to encourage staff to become healthier. The Committee hosted numerous events in the new wellness room, with exercise equipment and videos of exercise routines donated by staff members. The Committee also sponsored the *Arriba* challenge which tracks participants' exercise and offers cash incentives to competitors.

Friends of the TMC Library

John E. Wolf, Jr., MD, MA
President, Friends of the
Texas Medical Center Library

After serving as a member of the Friends of the Texas Medical Center (TMC) Library Board of Directors, I was selected by the Board to become its President in January 2010. Together with the Board officers, we are committed to providing the guidance and foresight required to support The TMC Library and to strengthen and grow the Friends organization.

The mission of The Friends of The TMC Library is to support and promote The TMC Library. The

Friends' goals are to:

- Increase public awareness and use of the Library
- Support the Library's development and delivery of biomedical information
- Raise funds for the Library
- Serve in an advisory capacity to the Library

Over the past year, the bimonthly meetings of the Friends have been enriched with speakers from various backgrounds including a mediation attorney and a local historian. Focus has been placed on Board recruitment and fundraising. Two fundraising events were held this year. *Murder Past Due: Up Close With the Author* took place in December, and featured the Library's own best-selling author, Dean James, PhD, aka Miranda James. The second event, *Magic, Mentalism & Wine: A Mind-Boggling, Memorable Mix*, was held in June. The entertainment was provided by a local cardiologist/world-class magician and his attorney/mind-reading wife, Dr. and Mrs. John "Ace" Passmore. These parties helped the Friends achieve two important goals: increasing public awareness of the Library and raising much-needed funding for

the Library. We are in the process of planning the next gathering scheduled for February, 2012, *An Evening With Icons*, honoring Denton Cooley, MD and James "Red" Duke, MD, and fully expect another success. Board Secretary, Herbert L. Fred, MD, MACP, is again the event chair.

The Friends and I are grateful to the steadfast participation of L. Maximilian Buja, MD, Executive Director, and the Library staff members, who share our dedication to the Library. We look forward to another productive year and continued success. If you are interested in learning more about the Friends, please see the Library's new [website](#).
