

## Call for Papers

### ***Journal of Applied Research on Children: Informing Policy for Children at Risk***

Volume 13, Issue 2

Healthcare Misinformation and Child, Family, and Community Health

Editors-in-Chief:

Christopher Greeley, MD, MS (Texas Children's Hospital, Baylor College of Medicine)

Robert Sanborn, Ed.D. (CHILDREN AT RISK)

Guest Editors:

Brian Southwell, PhD, RTI International & Duke University

Aditee Narayan, MD, Duke University

Lavanya Vasudevan, PhD, Duke University

Jamie Wood, PhD, Duke University

Published by CHILDREN AT RISK and the Texas Medical Center Library and edited by the CHILDREN AT RISK Institute, the *Journal of Applied Research on Children (JARC)* serves to inform policy affecting children by providing applicable research to the public, child advocates, and policymakers on timely children's issues. Providing practical case studies and research on the transformative potential of policy change, JARC issues provide a powerful link between data and policy solutions to strengthen the arguments of child advocates across the country.

Academic literature on misinformation has exploded in recent years and yet much of that work either tracks the prevalence of misinformation generally or points to population-based interventions intended to reduce that prevalence. Considerable work also has focused on parental acceptance of clinician recommendations for children's health such as vaccination recommendations. Less work has considered how and why families are vulnerable to medical misinformation regarding children's health or the implications of that vulnerability for intervention development.

This special issue of the *Journal of Applied Research on Children* will feature papers that advance our understanding of misinformation in the family health context and what might be done about it. Quantitative and qualitative papers will be welcome but all papers should report empirical data and advance our understanding of what steps might be taken to reduce the effect of misinformation on family decision-making, patient-provider relationships, or population welfare in the future.

The *Journal of Applied Research on Children* is available online in an open-access format ([jarc.childrenatrisk.org](http://jarc.childrenatrisk.org)) and is indexed in CINAHL and SocINDEX, making it available to child advocates, researchers, practitioners, and policymakers across America. Since its launch, journal articles have been downloaded over 165,000 times worldwide. The submission and rigorous double-blind peer review process are completed entirely online. Authors are encouraged to take advantage of the journal's online format by including videos, interactive charts, or links to online resources.

We encourage interested authors to submit a 400-word abstract and letter of interest to the managing editor at [jarc@childrenatrisk.org](mailto:jarc@childrenatrisk.org) by **November 18, 2022**. If the abstract is approved, full manuscripts will be due **March 3, 2023**. To view past issues of the journal or to submit a manuscript, please visit [jarc.childrenatrisk.org](http://jarc.childrenatrisk.org).
